Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-18 and 20-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1, from which the balance of the claims depend, provides for the utilizing of an emulsion polymer, but, since the claim does not actually set forth any steps involved in the utilizing method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.
4. In addition, the claims are replete with indefinite language, failing to conform with current U.S. practice. Some of the indefinites are as follows:

Claims 6 and 20 recite the limitation "the difference in refractive index" in claim 1. There is insufficient antecedent basis for this limitation in the claim. There is no recitation of "refractive index" in claim 1.

Claims 12, 13, 15 and 16 recite the limitation "the transparent layer" in claim 1. There is insufficient antecedent basis for this limitation in the claim. There is no recitation of a " transparent layer " in claim 1.

Claim 17 recites the limitation "the transparent polymer layer", but there is not prior mention of a " transparent polymer layer " in the claim. There is insufficient antecedent basis for this limitation in the claim because it is unclear to which transparent polymer layer this limitation is referring.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. Claims 1-16, 18 and 20-24 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-18 and 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoshino et al. (USPN 5273824), Bardman et al. (US 2002/0072560) or Gharapetian et al. (USPN 5229209).

While it is unclear exactly what process, or product thereof, applicant is claiming, as stated above, it is believed that each of these references teach applicant's invention.
